

foodgo Sprint 1 Report

Product Name : foodgo

Team Name : team foodgo

Sprint Completion Date : 2/4/18

Revision Number : 0.1

Revision Date : 2/4/18

Actions to Stop Doing

- Stop arriving late to Scrum meetings - We often arrive late to meetings and keep the TA and other members waiting. This is poor communication and a bad Scrum practice.
- Stop ignoring messages in the group chat! We need to confirm that we read and understand what other teammates are trying to communicate.

Actions to Start Doing

- Start coding. It is good to research and read documentation but the best way to learn technologies is to just get your hands dirty.
- Start communicating better. Let other teammates know what you are working on during the week, not just in our scrum meetings.

Actions to Keep Doing

- Keep having group work sessions. When we work together as a group, we are able to help each other and peer code.
- Keep communicating about roadblocks. It is good to let your teammates know when you run into an issue so that they can support you and stay updated on the project.

Work Completed

- **Frontend** - Learning React.js, Landing page, number of people input
- **Backend** - Learning Firebase, Sending the # of people and generating a random room code to firebase.

Work Not Completed

- **Frontend** - Page that displays the code to the host, a page for when all the users are in a group, and taking input from all users in the group

Work Completion Rate

- Finished 1/3 user stories, with user story 2 almost finished (just need to display the code to the host).
- Spent accumulated estimate of 35/45 ideal hours (possibly more since everyone was learning the stack) within the whole group. This prior sprint consisted of 14 days.
- We finished 0.0714 user stories/day
- Ideal work hours: 2.5 hours/day
